**BODY JEWELRY**  
**2021-2022**

## AMAZINGBODYJEWELRY

Horario: de lunes a viernes de 10:00 y 14:30 - 16:00 y 20:00  
C/Bonastruc de Porta 3, 17001 (Girona) - Tel: (34) 972.22.74.15 / 972.22.31.33  
C/ Ballesterias 11, 17004 (Girona)  
Mobil : 682.666.737 Whatsapp.  
E-mail : [info@abj99.com](mailto:info@abj99.com) / [info@amazingodyjewelry.com](mailto:info@amazingodyjewelry.com)

**AMAZINGBODYJEWELRY** les saluda y les presenta un año más el nuevo Catálogo 2021-2022 básico y de accesorios, donde podrán contar con una amplia gama de novedades en el mundo del Piercing.

Nuestro catálogo básico 2021-22 reúne piezas clásicas, novedades de gran calidad al mejor precio, un gran surtido de piezas nuevas de todos los modelos de piercing y una gran variedad de piezas de rosca interna en 0.8mm y 1.2 y Push-Pin (principalmente en titanio grado de implante), además de algunas piezas en acero quirúrgico.

Les hacemos llegar nuestra tarifa física de precios del catálogo 2021-22, y para las piezas de catálogos suplementarios, podrán acceder a sus precios desde nuestra web [www.abj99.com](http://www.abj99.com).

Los productos que no tengan número de página en el lateral izquierdo, en la tarifa física, son piezas básicas que tenemos en stock y no están catalogadas. Aún así, para cualquier duda, ya sea de medidas que no estén catalogadas o en diferentes materiales y colores, no duden en consultarnos.

Todos los productos de catálogos anteriores, estarán disponibles con el mismo precio del año que estén catalogados hasta el final de sus existencias.

**AMAZING BODY JEWELRY** les facilita su página Web, donde encontrarán las últimas novedades y actualización de la misma.

[www.abj99.com](http://www.abj99.com)

Además, pueden descargarse los precios en su ordenador, Tablet o teléfono móvil en el siguiente enlace <http://www.abj99.com/es/area-privada>. Para entrar, deben añadir el siguiente código de acceso (227415). Podrán guardar el archivo con los precios en PDF o solicitarlo vía e-mail a ([info@abj99.com](mailto:info@abj99.com)).

Disponible también en formato Excel-PROFORMA. Al realizar el pedido en este último formato, tendrán la posibilidad de seleccionar directamente las medidas que necesitan junto con el color de la pieza, si fuera necesario, e introducir las cantidades.

En este formato se calculará automáticamente el importe del pedido que quieren realizar.

**AMAZING BODY JEWELRY** pretende facilitarles el trabajo, a la vez que mejorar el servicio que les ofrecemos, siendo más precisos ya que consideramos que es un sistema mucho más práctico a la hora de tener el propio presupuesto y evitar errores cuando se prepare el pedido.

En esta nueva hoja de pedido, encontrarán exclusivamente las referencias del catálogo 2021-22. Para las que no se encuentren en este catálogo básico, podrá pedir las vía e-mail, utilizando la hoja de pedido habitual o bien en la misma PROFORMA, en el apartado comentarios (parte izquierda del archivo).

Si tienen cualquier duda en el momento que quieran realizar el pedido con el nuevo formato, estamos a su disposición tanto vía e-mail como telefónicamente.

Cedemos exclusivamente a nuestros clientes todos los certificados de calidad de nuestros productos.

### **Información adicional:**

Todos los productos que no tengan número de página en la sección de precios de nuestra página web, son piezas básicas de las que disponemos.

Pregúntenos por medidas que no estén catalogadas, seguro que las tenemos a su disposición, incluso de una gran variedad de medidas no básicas.

Informaros que este año, gracias a todos vosotros, cumplimos nuestro 22 aniversario en el mundo de la joyería y del piercing. Por este motivo, queremos celebrarlo haciendo promociones especiales durante todo el año, donde lo especificaremos en nuestra cuenta de Instagram [@amazingbj99](https://www.instagram.com/amazingbj99), así que...estad atentos !!!

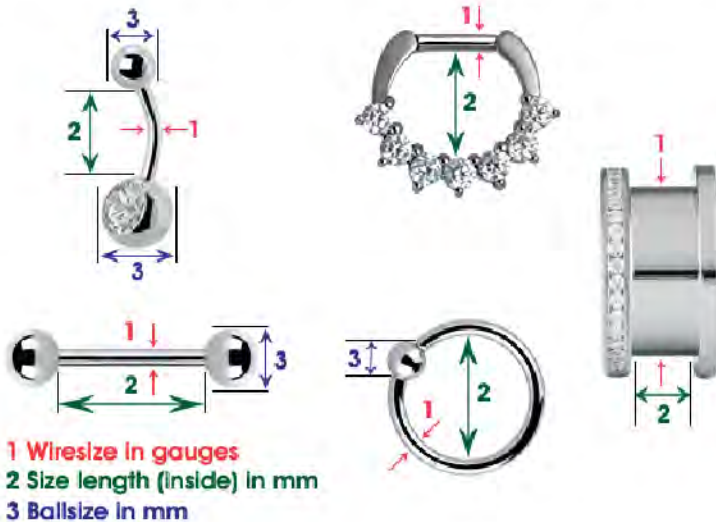

# PRODUCT INFORMATION

To help you understand our product sizing accurately, we use both the Metric and Imperial measurement system.

Metric is in millimeters (mm)

Imperial is in gauges (ga) and inches (")

For your convenience, we provide all our piercing specifications in both systems throughout our product catalog online and printed. Please refer to our conversion chart shown for easy reference.

Gauges	Metric
22ga -	0.6mm
20ga -	0.8mm
18ga -	1.0mm
16ga -	1.2mm
14ga -	1.6mm
12ga -	2.0mm
10ga -	2.5mm
8ga -	3.2mm
6ga -	4.0mm
4ga -	5.0mm
2ga -	6.0mm
0ga -	8.0mm
00ga -	10.0mm

## PIERCING SIZES

Piercings are measured by thickness, diameter and width.

Piercing Rings are measured by the internal diameter.

Septum Clickers are measured by the pin thickness and the internal height.

Straight and curved barbells are measured by the linear width between ball to ball.

**1.** Wire size is indicated in ga or mm (please refer to red markings)

It refers to the diameter size of the stem (thickness of the wire). We indicate this size in gauge and millimeter. For example; 14GA (1.6MM)

**2.** Size (length) is indicated only in mm (please refer to green markings)

**3.** Balls or spikes and all other attachments are indicated only in mm (please refer to blue markings)

## GENERAL GUIDELINES

Ear stud pins and hoops are standard in 0.8 mm

Nose piercings come in 0.8 or 1.0 mm

Eyebrow piercings are standard in 1.2 mm

Labrets are most common in 1.2mm but 1.0 and 1.6mm are also available.

We produce Threadless (TL) Labrets in 0.8mm as well.

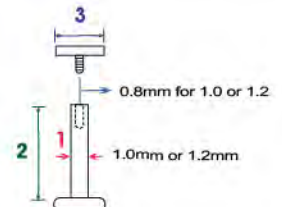

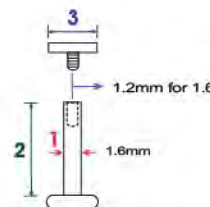

Septum, Conch, Rook and Daith Piercings are most common in 1.2 mm.

For Industrial barbell, Nipple, Tongue and Navel piercings 1.6mm is the norm for the majority of Piercers.

## INTERNALLY THREADED

All our internally threaded items use the specification shown below.

Wire/Stem Size	Internal Thread
1.6 mm	1.2 mm
1.2 mm	0.8 mm
1.0 mm	0.8 mm

Please Note :

0.8 mm is the standard for most European suppliers but some USA suppliers may prefer 0.9 mm as their standard.

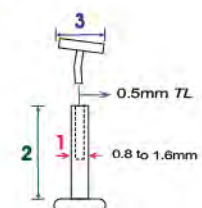

If you are not sure, please check with your supplier or with us.

## THREADLESS (TL)

Our Threadless posts have a 0.5mm hole to hold the slightly thinner and pre-bended Threadless Attachment pins firmly in place.

This enables us to offer Labrets, Micro Barbells, Barbells, Nose pins and others from the size of 0.8mm on.

This sizes are mostly used in the Piercing Industry.

**SURGICAL STEEL 316L**

SS316L is a surgical implant grade, which is the most used material for Body Jewelry.  
Due to the EU Nickel Directive introduced in Europe in 2001, steel is only recommended for healed piercings.

**CHIRURGENSTAHL 316L**

SS316L ist ein rostfreier Chirurgenstahl, welcher das meistverbreitete Material bei Piercings ist.  
Wegen den Nickelrichtlinien, ist Stahl nur für verheilte Piercings zu empfehlen.

**ACIER CHIRURGICAL 316L**

L'acier chirurgical (SS316L) est le matériel le plus fréquemment utilisé pour les piercings.  
Du à la directive Européenne introduite en Europe en 2001, l'acier chirurgical n'est recommandé que pour l'utilisation des piercings cicatrisés.

**ACERO QUIRURGICO 316L**

SS316L Es un implante de gradoquirúrgico, el cual, es el mas usado para material de Body piercing.  
Debido a la Normativa EU de Níquel introducida en Europa en el 2001, el acero esta recomendado solo para piercings curados.

# 24K REAL GOLD PVD

## 24K real Gold is coated using a PVD (Physical Vapor Deposition) process.

The jewelry is coated in a heated chamber under high vacuum.

Electric voltage applied will form a plasma in the chamber and the introduction of various gases produces an ion bombardment. This bombardment atomizes the cathode material (24k real Gold) into tiny substances which are deposited on the jewelry. The result is a hardened layer, which is biocompatible. It can be autoclaved.

## Ist eine 24 karat Gold Beschichtung unter Verwendung eines PVD (Physical Vapor Deposition) Prozesses.

Der Schmuck wird in einer erhitzten Kammer im Hochvakuum beschichtet. Elektrische Spannung hilft ein Plasma in der Kammer zu bilden, und die Einführung von verschiedenen Gasen erzeugt einen Ionenbeschuss. Dieses Bombardement zerstäubt das Kathodenmaterial (24 karat Echtgold) in winzige Substanzen, die auf dem Schmuck abgelegt werden. Das Ergebnis ist eine gehärtete Schicht, die biokompatibel ist.

Es kann autoklaviert werden.

## Le placage de l'Or 24K se fait à l'aide d'un processus nommé PVD (Physical Vapor Deposition).

Les bijoux sont placés dans une chambre chauffée sous vide. La tension électrique appliquée va former un plasma dans la chambre et l'introduction de différents gaz produit un bombardement ionique. Ce bombardement atomise le matériau de cathode (or 24 carats réel) en substances minuscules qui sont déposés sur les bijoux. Le résultat est une couche durcie, qui est biocompatible et peut être stérilisé en autoclave.

## El oro de 24k se recubre con un proceso, el PVD (Deposición Física del Vapor).

la joyería se cubre con diversos gases que producen una concentración de iones que se depositan en la joyería.

El resultado es una capa endurecida que recubre las piezas y es biocompatible. Apto para esterilizar en autoclave.

# CULTURED FRESHWATER PEARLS

Cultured freshwater pearls get their name from being cultured in freshwater lakes or pond farms, with China and the United States being the main sources. They have the widest range of shapes, sizes, and colours available, and are typically the most affordable.

Slight variation of colour and shape it's a sign of their individuality and naturally occurring.

Their unique shapes and wide range of colors combined with their attractive prices and charming character, have made them a favorite among jewelry designers, shoppers and pearl connoisseurs alike.

### NICKEL FREE COBALT CHROMIUM ALLOY (CoCr NF)

Cobalt Chromium Alloys possess high corrosion resistance and amazing strength. It is very hard to break, bend, deform or even scratch. At the same time, it has appealing white color and shine that resembles precious metals like white gold or platinum. It is widely used in the dental industry and for medical implants like knee and hip joints.

The alloy we use is Nickel Free with a smooth and shiny surface. The price is higher than Surgical Steel but lower than Titanium.

### NICKELFREIE KOBALT CHROM LEGIERUNG (CoCr NF)

Kobalt Chrom Legierungen besitzen eine hohe Korrosionsbeständigkeit und eine erstaunliche Festigkeit. Es ist sehr schwer zu zerbrechen, verbiegen, verformen oder zerkratzen. Gleichzeitig hat es eine attraktive weiße Farbe und Glanz, der Edelmetallen wie Weißgold oder Platin ähnelt. Es wird in der Dentalindustrie und für medizinische Implantate wie Knie und Hüftgelenke weitgehend verwendet.

Die von uns verwendete Legierung ist nickelfrei mit einer sehr glatten und glänzenden Oberfläche. Der Preis ist etwas höher als Chirurgenstahl, aber niedriger als Titan.

### ALLIAGE DE CHROME ET DE COBALT SANS NICKEL (CoCr NF)

Les alliages de cobalt et de chrome possèdent une résistance élevée à la corrosion et une résistance incroyable. Il est très difficile à casser, plier, déformer ou même rayer. En même temps, il a une couleur et un éclat blanc attrayant qui ressemble à des métaux précieux comme l'or blanc ou le platine.

Il est largement utilisé dans l'industrie dentaire ainsi que pour les implants médicaux comme les articulations du genou et de la hanche.

L'alliage que nous utilisons est sans nickel avec une surface lisse et brillante. Le prix est plus élevé que l'acier chirurgical mais inférieur au titane.

### ALEACIÓN DE CROMO COBALTO LIBRE DE NIQUEL (CoCr NF)

Las aleaciones de cromo cobalto poseen una alta resistencia a la corrosión y una resistencia sorprendente. Es muy difícil romper, doblar, deformar o incluso rayar. Al mismo tiempo, tiene un atractivo color blanco y brillo que se asemeja a los metales preciosos como el oro blanco o el platino.

Es ampliamente utilizado en la industria dental y para implantes médicos como articulaciones de rodilla y cadera.

La aleación que utilizamos es libre de níquel con una superficie lisa y brillante. El precio es más elevado que el acero quirúrgico pero inferior al titanio.

### TITANIUM 6AL-4V-ELI

Titanium is ideal for both initial body piercings and healed piercings as it is compliant with the EU Nickel Directive introduced in Europe in 2001. Because of its virtually 'Nickel Free' content Titanium has become one of the preferred materials used in piercing jewelry.

Grade Ti6AL-4V, ASTM F136 is the specification for the alloy to be used for surgical implants. Titanium is only half the weight of steel and twice as strong.

Certificates are available on our website.

### TITAN 6AL-4V-ELI (Grad 23)

Titan eignet sich ideal für den Ersteinsatz und geheilte Piercings, da es der EU-Nickelrichtlinie entspricht, die 2001 in Europa eingeführt wurde. Aufgrund seines nahezu "nickelfreien" Inhalts, ist Titan zu einem der bevorzugten Materialien bei Piercingschmuck geworden.

Ti6AL-4V, ASTM F136 ist die Spezifikation für die Legierung, die für chirurgische Implantate verwendet werden soll. Titan ist nur halb so schwer wie Stahl und doppelt so stark.

Zertifikate gibt es auf unserer Webseite.

### TITANE 6AL-4V-ELI

Le titane est idéal pour les piercings initiaux ainsi que pour les piercings déjà cicatrisés, car il est conforme à la directive européenne sur le nickel introduit en Europe en 2001. En raison de sa teneur en nickel pratiquement nulle, le titane est devenu l'un des matériaux privilégiés pour le perçage de bijoux.

Le titane de type Ti6AL-4V, ASTM F136 est la spécification de l'alliage à utiliser pour les implants chirurgicaux. Le titane ne pèse que la moitié de l'acier et est deux fois plus résistant.

Les certificats sont disponibles sur notre site Web.

### TITANIO 6AL-4V-ELI

El titanio es ideal tanto para las perforaciones iniciales como para las perforaciones ya curadas, ya que cumple con la Directiva de níquel de la UE que se implanto en Europa en 2001. Debido a su contenido "libre de níquel", el titanio se ha convertido en uno de los materiales preferidos para el uso de las perforaciones iniciales en joyería.

El grado Ti6AL-4V, ASTM F136 es la especificación de la aleación que se utilizará para los implantes quirúrgicos. Este titanio pesa la mitad que el acero y es el doble de resistente.

Los certificados están disponibles en nuestra pagina web.

# INTERNALLY THREADED JEWELLED BASICS

We use 0.8mm threads for our 1.2mm internally threaded items.

Attachments are compatible throughout our entire collection.

0.8mm is the standard for most European suppliers but some US Suppliers might use 0.9mm as the standard.

If you are not sure, please check with your supplier or with us.

1.6mm internally threaded items are having the same 1.2mm standard threads all over the world.

## T-ILBALL

TITANIUM G23 INTERNAL BALLS

GAUGES ① BALL SIZE ③  
1.2mm (for 1.6mm internal) 2.5, 3, 4, 5, 6mm

## T-IRPIN

INTERNAL STRAIGHT BARBELL  
PIN for 1.2mm THREAD

GAUGES ① LENGTH ②  
14ga (1.6mm) 5,6,7,8,9,10,11,12,13,14,15,16,18,19,20,22,24mm

## TIBRB

INTERNAL STRAIGHT BARBELL

GAUGES ① LENGTH ② BALL SIZE ③  
14ga (1.6mm) 5,6,7,8,9,10,11,12,13, 4, 5, 6mm  
14,15,16,18,19,20,22,24mm

## T-IRPIN-L

INTERNAL STRAIGHT BARBELL  
PIN for 1.2mm THREAD

GAUGES ① LENGTH ②  
14ga (1.6mm) 26,28,30,32,34,36,38,40mm

## TIBRB-L

INTERNAL STRAIGHT BARBELL

GAUGES ① LENGTH ② BALL SIZE ③  
14ga (1.6mm) 26,28,30,32,34, 4, 5mm  
36,38,40mm

## T-IBPIN

INTERNAL BANANA BARBELL  
PIN for 1.2mm THREAD

GAUGES ① LENGTH ②  
14ga (1.6mm) 8,10,12mm

## TIBBB

INTERNALLY THREADED BANANA

GAUGES ① LENGTH ② BALL SIZE ③  
14ga (1.6mm) 8,10,12mm 4, 5mm

## T-ICPIN

TITANIUM INTERNAL CIRCULAR  
BARBELL PINS

GAUGES ① LENGTH ②  
14ga (1.6mm) 8,10,12mm

## TIBCB

TITANIUM INTERNAL CIRCULAR  
BARBELL

GAUGES ① LENGTH ② BALL SIZE ③  
14ga (1.6mm) 8,10mm 3, 4mm  
14ga (1.6mm) 12mm 3, 4, 5mm

## T-ILPIN

TITANIUM LABRET PIN

GAUGES ① LENGTH ②  
14ga (1.6mm) 4, 5, 6, 7, 8, 9, 10, 11, 12mm

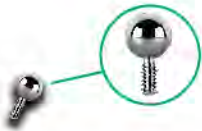

## TBILB

TITANIUM LABRETS W/BALL

GAUGES ① LENGTH ② BALL SIZE ③  
14ga (1.6mm) 6,7,8,9,10,11,12mm 2.5, 3.0, 4mm

# INTERNALLY THREADED JEWELLED BASICS

## T-ILBALLN

TITANIUM G23 INTERNAL MICRO BALLS

GAUGES ① BALL SIZE ③  
0.8mm (for 1.2mm internal) 2.0,2.5,3.0,4.0mm

## T-IRNPIN

INTERNAL STRAIGHT MICRO BARBELL PIN for 0.8mm THREAD

GAUGES ① LENGTH ②  
16ga (1.2mm) 5,6,7,8,9,10,12mm

## TIBRBN

INTERNAL STRAIGHT MICRO BARBELL

GAUGES ① LENGTH ② BALL SIZE ③  
16ga (1.2mm) 5,6,7,8,9,10,12mm 2.5,3mm

FIXED BALL 2.5mm

## T-IRNS

TITANIUM ONE SIDE INTERNALLY THREADED MICRO BARBELLS

GAUGES ① LENGTH / Ø ②  
1.2mm (for 0.8mm internal) 4.5,6,7,8,9,10,12mm

## T-IRNPIN-L

INTERNAL STRAIGHT MICRO BARBELL PIN for 0.8mm THREAD

GAUGES ① LENGTH ②  
16ga (1.2mm) 14,16mm

## T-IBNPIN

INTERNAL MICRO BANANA BARBELL PIN for 0.8mm THREAD

GAUGES ① LENGTH ②  
16ga (1.2mm) 6,7,8,9,10,12mm

# CULTURED FRESHWATER PEARLS

## INTERNALLY THREADED

Cultured freshwater pearls get their name from being cultured in freshwater lakes or pond farms, with China and the United States being the main sources. They have the widest range of shapes, sizes, and colours available, and are typically the most affordable.

Slight variation of colour and shape it's a sign of their individuality and naturally occurring.

Their unique shapes and wide range of colors combined with their attractive prices and charming character, have made them a favorite among jewelry designers, shoppers and pearl connoisseurs alike.

DISPLAY STANDS FOR THREADLESS ATT. - SET OF 3PCS

GAUGES ①  
0.5mm TL

Gold is considered as one of the most precious metals in the world and is

appropriate for initial piercings if it's 18k.

Gold higher than 18k is too soft for body jewelry because it can easily be scratched.

G18K- stands for 18karat (750 Gold) yellow Gold.

RG18K- stands for 18karat (750 Gold) Rose gold.

WG18K- stands for 18karat (750 Gold) White Gold which is Rhodium Plated.

More Information and certificates are available on our website.

L'or est considéré comme l'un des métaux les plus précieux au monde et convient parfaitement aux piercings initiaux, qu'il soit de 18 carats.

Un or supérieur à 18 carats est trop mou pour les bijoux corporels car il peut se rayer facilement.

G18K est le code utilisé pour de l'or jaune 18 carats (Or 750).

RG18K est le code utilisé pour de l'or rose 18 carats (Or 750).

WG18K est le code utilisé pour de l'or blanc 18 carats (Or 750).

Celui-ci est plaqué au rhodium.

Plus d'informations ainsi que les certificats sont disponibles sur notre site.

Gold gilt als eines der wertvollsten Metalle der Welt und eignet sich für den Ersteinsatz falls es 18k ist. Gold über 18 Karat ist zu weich für Piercings weil es leicht zerkratzt werden kann.

G18K steht für 18 Karat (750 Gold) Gelbgold.

RG18K- steht für 18Karat (750 Gold) Rose Gold.

WG18K- steht für 18 Karat (750 Gold) Weißgold, das rhodiniert ist.

Weitere Informationen und Zertifikate gibt es auf unserer Website.

El oro es considerado como uno de los metales más preciosos del mundo y es apropiado para perforaciones iniciales si es de 18k mínimo .

Hay que tener en cuenta que el oro superior a 18k, es demasiado blando para la primera perforación ya que se puede rayar fácilmente.

G18K- significa 18karat (750 Gold) oro.

RG18K - significa oro rosa 18karat (750 Gold).

WG18K - significa oro blanco 18karat (750 Gold) que está chapado en rodio

Para más información y certificados están disponibles en nuestra página web.

Wherever there is enough surface space, we mark all our Real Gold items with 750 (18 karat). Additionally, we also mark our Swiss Responsibility Mark ("Verantwortlichkeitsmarke") which guarantees the gold content of our products.

Each 18 Karat Yellow Gold Item (G18K) can also be made to order in 18K Rose Gold or White Gold.

Smaller items like attachments or similar are MTO 10.

Big items like bananas or clickers are MTO 5.

**BIOPLAST®** is Bio compatible (Certificate available). **BIOPLAST®** is flexible. **BIOPLAST®** can be cut to any length and threaded by any metal ball closure. People getting pierced with **BIOPLAST®** have less swelling and infections. The healing process with **BIOPLAST®** is faster than with other materials. No allergic reaction (no nickel). **BIOPLAST®** has competitive price and comes in 4 basic colors. **BIOPLAST®** can be combined with SS316L, Titanium, Silver or Gold. **BIOPLAST®** is the best material for initial piercing.

**BIOPLAST®** ist biokompatibel, d.h. es wird vom körpereigenen Gewebe vollständig toleriert. **BIOPLAST®** ist biegsam und passt sich Körperkonturen an. **BIOPLAST®** kann auf jede beliebige Länge gekürzt werden. Ausserdem kann durch jede Stahl-oder Titankugel durch einfaches Aufschrauben ein Gewinde erzeugt werden. **BIOPLAST®** verursacht beim Verheilungsprozess eines Piercings weniger Schwellungen und Entzündungen als Z.B. Titan. Durch verkürzt sich der Verheilungsprozess im Vergleich zu anderen Materialien. Allergische Reaktionen auf **BIOPLAST®** sind derzeit unbekannt. **BIOPLAST®** kann autoklaviert werden. **BIOPLAST®** ist in vielen trendigen Farben erhältlich und kann mit Chirurgenstahl, Titan, Silber oder Gold kombiniert werden. Derzeit ist **BIOPLAST®** das geeigneteste Material zum Ersteinsetz von Körperschmuck.

**BIOPLAST®** est bio compatible (certificat disponible sur demande). **BIOPLAST®** est flexible. **BIOPLAST®** peut être coupé à n'importe quelle longueur et facilement fileté en vissant une boule de métal. Les risques d'infection et d'inflammation sont moindres pour les personnes percées avec **BIOPLAST®**. **BIOPLAST®** permet une cicatrisation plus rapide comparé à d'autres matériaux. Aucune réactions allergiques (ne contient pas de nickel). **BIOPLAST®** peut être stérilisé par autoclave. **BIOPLAST®** est très économique et disponible en 4 couleurs. **BIOPLAST®** peut être combiné avec de l'acier chirurgical (SS316L), du Titane, de l'Argent ou de l'Or. **BIOPLAST®** est le matériau idéal pour un premier piercing.

**BIOPLAST®** es Bio compatible (Certificado disponible). **BIOPLAST** es flexible. **BIOPLAST®** se puede cortar en cualquier tamaño y enroscar con cualquiera bola de metal. La gente que usa **BIOPLAST®** tienen menos infecciones inflamaciones y no tiene reacciónse alérgica. El proceso de curación con **BIOPLAST®** es más rápido que con otros materiales. No hay reacción alérgica (sin níquel). **BIOPLAST®** puede ser esterilizado con autoclave. **BIOPLAST®** tiene precio competitivo y viene en 4 colores básicos. **BIOPLAST®** puede ser combina con SS316L, Titanio, Plata u Oro. **BIOPLAST®** es el mejor material para la perforación inicial.

# PRE STERILIZED BODY JEWELRY 10 PCS BOX

## E.O. (Ethylene Oxide) Gas sterilization

E.O. has a high sterility assurance level and penetrates very well. Piercing Jewelry sterilized with E.O. will stay sterile for at least 5 years when kept away from light.

We clean and QC every item before the process. Items are packaged unassembled as it assures the sterilization of the thread.

This meets all necessary standards in Europe.

# PIERCING LAB

## PRODUCTS FOR PIERCERS & STUDIOS

### SILICONE PIERCING DISCS

The Piercing Disc helps the healing process for fresh piercings, Hypertrophic Scarring and Keloids. The disc is used between the piercing attachment (ex: balls) and the skin.

## **Información sobre envíos:**

**ENVÍOS:** Para poder efectuar los envíos, trabajamos sobre un importe mínimo de 120,00€ más I.V.A. Ocasionalmente, todos los envíos inferiores a 120,00€ más I.V.A, el cliente correrá con los gastos de portes y reembolso (si lo hubiese sería de 7,90€.) De 120€ a 200€, el cliente pagará únicamente el envío (min. 5,50€, en caso de pedir expositores los precios pueden variar según peso y volumen ) y a partir de 200€ **Amazing Body Jewelry** se hará cargo de todos los gastos referentes a envíos y reembolsos (si los hubiese).

\*No se harán **restos** de pedidos para los pedidos inferiores a un importe de **120,00€**.  
Para Islas Baleares y Canarias consultar tarifa.

## **Para transferencias internacionales y nacionales:**

Oficina: Plaza Independencia, 18 17001 Girona.Tel. 972247110

## **Información sobre los restos de pedidos:**

Debido a los cambios y las últimas tendencias en el mundo del piercing, nos hemos encontrado que en los últimos años esta siendo de una gran dificultad disponer de stock de todas las referencias (con sus respectivas medidas, grosores, colores etc,) que ofrecemos en nuestro catálogo. Este hecho es debido a la gran variedad de joyería que ofrecemos y a la diversidad de medidas disponibles actuales. El cliente ha de tener en cuenta que cada semana se fabrican y se diseñan nuevas piezas.

\*Disponemos de 5.000 referencias, convertibles a 150.000 (si añadimos las posibles combinaciones de materiales, medidas, colores ....)

Sin embargo, nuestro material básico, siempre esta disponible al completo, por lo que podremos servir este material en concreto en un periodo de 24 horas.

Por otra parte, para las piezas que no dispongamos en stock y no sean básicas, su tiempo de entrega actual puede oscilar entre 1 y 4 semanas, excluyendo algunas piezas engarzadas a mano que pueden tardar un periodo superior (entre 4 y 8 semanas máximo). Eso es debido a la producción masiva de nuevas medidas de 0.8mm y de 1.2mm de grosor, ya que suelen ser piezas manufacturadas y de dimensiones muy pequeñas, por lo que conlleva un tiempo de fabricación mayor a causa de su alta laboriosidad.

ORO, como podréis apreciar en este nuevo catálogo, hemos introducido una gran variedad de piezas de oro, tanto en clickers, nariz, piezas internas, básicas, etc... Debido a su coste elevado y a su gran variedad de piezas, en el caso de no tenerlas en stock (que será lo más probable), no se admitirán cancelaciones de pedido, debido a que se fabricarán exclusivamente bajo pedido y el tiempo de fabricación oscilará entre las dos y las ocho semanas.

En referencia a los precios del oro, no serán los establecidos en el listado de precios, ya que serán actualizados según como este el mercado del oro. Por lo que será recomendable revisar los precios de estas piezas antes de realizar el pedido, porque los marcados en el listado de precios serán orientativos de cuando se envió el catálogo (aunque no deberían variar en exceso).

Es importante saber toda esta información, ya que al mismo tiempo que nuestros clientes se quedan sin existencias de algunas referencias, nosotros, como distribuidores fabricantes, también nos sucede lo mismo.

Nos encontramos que muchos estudios, al no hacer una inversión en stock, deciden solo vender las piezas mostradas sobre catálogo, sin saber que al hacerlo de esta manera, se arriesgan a no tenerla a tiempo, ya sea por falta de existencias en el mismo momento o por falta de existencias nuestras.

En este preciso instante, es cuando hay que tener presente que es necesario un tiempo para poder fabricar y volver a disponer de stock de estas referencias, aunque estamos mejorando para que el período de fabricación disminuya en el mínimo posible.

**AMAZING BODY JEWELRY** les envía un cordial saludo.
